- 1-Year Limited Warranty

* each sold separately

EtherFast® Cable/DSL Router

*Connect Your Network to Your High-Speed
Cable or DSL Internet Pipeline with the
Ultimate in Security and Control*

The Linksys Instant Broadband™ EtherFast® Cable/DSL Router is the perfect solution for connecting a small group of PCs to a high-speed broadband Internet connection or a 10/100 Ethernet backbone. Configurable as a DHCP server for your existing network, the EtherFast® Cable/DSL Router acts as the only externally recognized Internet gateway on your local area network (LAN). The Router can be configured to filter internal users' access to the Internet and serve as an Internet NAT firewall against unwanted outside intruders. For enhanced network security against Internet threats and/or viruses, the Cable/DSL Router works with ZoneAlarm Pro and/or PC-cillin (each sold separately).

A typical router may have to rely on a separate hub or switch to share its broadband Internet connection, but the EtherFast® Cable/DSL Router from Linksys channels this connection through the blazing, full duplex speed of its built-in EtherFast® 10/100 4-Port Switch. This cutting-edge combination of router and switch technology eliminates the need to buy an additional hub or switch and serves your network as a completely dedicated, full duplex backbone. Now your entire network will enjoy blazing broadband Internet connections supported by its robust switched backbone. With the dual-function speed and power of the EtherFast® Cable/DSL Router, your network will take off at speeds faster than you ever imagined possible.

Features

- Connects to a Broadband Modem and a 10/100 Ethernet Backbone
- Use Just One IP Address to Access the Internet Over Your Entire Network
- Configurable Through Your Networked PC's Web Browser
- Supports IPSec Pass-Thru and PPTP
- Remote Administration and Remote Upgrades Over the Internet
- Internal 4-Port Switch Dramatically Speeds Up Your Gaming and Multimedia Connections
- Acts as a DHCP Server for Your Existing Network
- Administrators Can Block Specific Internal Users' Internet Access with Filtering
- Free Technical Support—24 Hours a Day, 7 Days a Week for North America Only
- 1-Year Limited Warranty
